

Article details

|                        |                                                                         |
|------------------------|-------------------------------------------------------------------------|
| Reference Code         | IT125                                                                   |
| Manufacturer           | QuickWood (Pavia di Udine - Italia)                                     |
| Model                  | QSS-4-1300                                                              |
| Category               | Automatic Brush Sanding & Structuring Machine / Spazzolatrice per Legno |
| Year of manufacture    | 2011                                                                    |
| Machine ID / Serial N° | 0467                                                                    |
| Operating status       | dismantled / available for inspection                                   |
| Availability           | immediate                                                               |

Technical specifications

|                                |                                                                               |
|--------------------------------|-------------------------------------------------------------------------------|
| Working width max. (Y)         | 1.300 mm                                                                      |
| Brushing heads configuration   | 4 rotating and oscillating brush units (QSS-4 system)                         |
| Processing functions           | Rustication / Structuring, Intermediate sanding, Denibbing, Cleaning          |
| Applicable brush materials     | Abrasive nylon bristles, Steel wire / Brass, Tampico fibers                   |
| Head motion mechanism          | Independent height adjustment with motorized rotation & oscillation           |
| Feed / Transport system        | Motorized heavy-duty belt conveyor with motorized roller tables               |
| Overall dimensions (Z x X x Y) | 2.600 x 7.120 x 2.450 mm                                                      |
| Power supply / Voltage         | 3x 380 V - 50 Hz                                                              |
| Protection class               | IP 54                                                                         |
| Total weight                   | 3.100 kg                                                                      |
| Structure & Enclosure          | Complete cabin enclosure with double inspection doors & dust extraction hoods |
| Declaration of CE-conformity   | ✓                                                                             |
| Conformity marking             | CE mark                                                                       |

Technical specifications generated directly from the machine's identification plate, structural parameters, and manufacturer technical specifications.
